

KAI MEDICAL MICROSURGERY KNIFE

Founded in 1908 in Seki-shi, Gifu Prefecture, Japan, the KAI Group is a cutlery manufacturer with over 100 years of history. Based on the "Blacksmithing spirit" of making tools for everyday life with excellent craftsmanship, the company has continued to innovate with advanced factory facilities and improved production technologies.

The KAI Group incorporates the "DUPS" concept in product development. The products have to be well-designed (Design), unique (Uniqueness), patent-worthy (Patents), safe (Safety) and full of stories (Stories). Our goal is to create products that meet these criteria, and through our products, we hope to create wonderful experiences and enjoyable moments for our customers. Today, we offer more than 10,000 products, ranging from kitchenware, confectionery, beauty care products (household items) to professional cutlery and medical products.

We will continue to strive to make our products an integral part of the daily lives of people around the world, taking into account the materials they are made from and the environmental impact of their disposal.

In the field of medical products, we use the technology we have developed in the production of razors and the other unique technology we have upgraded over the years to manufacture blades and instruments for use in ophthalmology, surgery and dermatology.

By improving the quality of our blades, we strive to improve the safety of the medical treatment and the quality of life (QoL) of patients around the world.

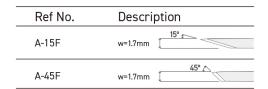

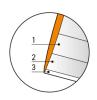

STAB KNIVES

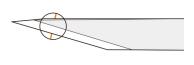

Cataract Surgery - Side Port, Lamellar Scleral Dissection

Our Stab Knife is made using the technology we have refined over the years in the manufacture of razor blades. Three bevel edge of the blade tip enables the smooth penetration and consistent sharpness.

MVR KNIVES Cataract Surgery - Side port / Vitreoretinal Surgery - Scleral Incision

Ref No.	Description
VK-20GF	φ=0.9mm

Specifically designed for side port of cataract surgery and for vitreoretinal surgery.

CLEAR CORNEAL KNIVES Cataract Surgery - Main port incision, Anterior Chamber Entry

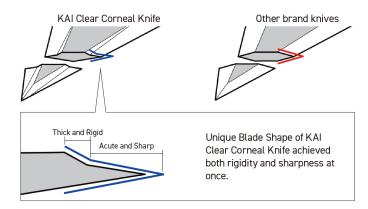

Ref No.	Description
CCR-24AGF	w=2.4mm
CCR-28AGF	w=2.8mm
CCR-30AGF	w=3.0mm
Double Bevel	Angle 45° 45°

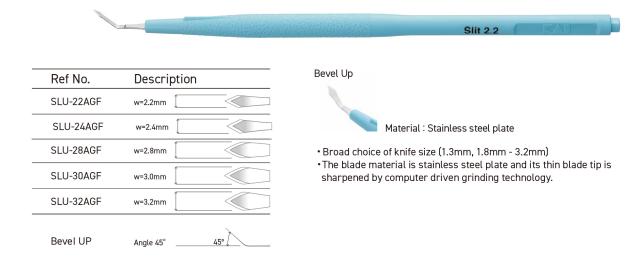

Material: Stainlass steel rod

- Broad choice of knife size (1.8mm 3.2mm)
- •The blade material is stainless steel rod. Clear corneal knife shaft is rigid by the rod material. It could be easier to transmit your operation directly to the blade tip. KAI forging technology is used for shaping the blade tip.

Unique Blade Shape of KAI Clear Corneal Knife

CRESCENT KNIVES

Cataract Surgery - Scleral Tunnel

Either straight or tapered sides are available to create the optimal tunnel or flap.

CWU type (Tapered)

Ref No.

Description

w=2.6mm

CWU-26AGF

Angle 60°

Angle 60°

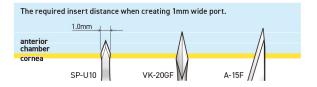

SIDEPORT KNIFE UTILITY

Ref No.	Descripti	on
SP-U10	Angle 45°	4.0mm

Stable Incision with Short Penetration

•The angle is made closer from the tip (SP-U10) and the length from the tip is 4.0mm, which enables to make stable incision of 1.0mm width even shorter penetration than MVR (VK-20GF) / stab knife (A-15F).

- 45 degree angled blade enables the penetration from upper/ temporal/ nasal direction. Easy in making a stable incision even with a retractor for microcornea eyes.
- Better selection for surgeons who prefer symmetric shape of the blade.

Manufactured to extend the incision for IOL implantation to create the exact size required to implant your intraocular lens of choice.

Ref No.	Description			
RNU-52AGF	w=5.2mm			
Bevel Up	Angle 45° 45°			

Product list - Regular type
